There is a teenage girl sitting in her bedroom at her desk in front of a computer screen which seems to be an online meeting. She is gazing out of the window and there are bacteria/viruses which seem to be COVID-19. We can also see that the room is very messy. There are also a lot of toilet rolls lying around. The girl also has her dog with her.

In my opinion, these things all signify how life was like during the COVID-19 pandemic. The toilet rolls signify the hoarding of toilet supplies that was done by many people at the start of the pandemic and the closed window with the viruses outside signifies how people were locked inside due to the threat of a disease if they went outside into the world. The computer screen indicates how everything shifted online and since this is a teenage girl we can assume that her computer screen is either an online class or a group video call with her friends.
